**Date:** 25 February 2006

---

---

### **A) Target Audience (age, level of language)**

Advanced, age 17-20

### **B) Estimated Time**

50 minutes

### **C) Aims (Rationale)**

Predicting through non-linear text

Sharing - checking guesses - reading for gist

Summarizing

Facilitating understanding

### **D) Materials**

Graph and written text

### **E) Presentation (Pre-Lesson Warm-Up, Instructions and Extended Activities)**

#### ***Pre-Lesson Warm-Up***

Title on blackboard (books closed); predict the topic through the title.

Speaking: group work: causes of overpopulation

#### ***Instructions***

1. Provide pupils with graphs - interpret and check.
2. Convert graphic information into a linear text.
3. Divide class into groups.
4. Assign Task 1: Each group reads paragraph 1 and comes out with a summarizing sentence -> discussion -> choosing the most suitable sentence
5. Do likewise with the remaining paragraphs

#### ***Extended or Follow Up Activities (optional)***

(same as assessment)

### **F) Assessment**

Free recall

Using multiple intelligences: respond freely to the information in the text -> draw a caricature, write slogans, etc.
